Warning! Zero-zero ratio too high - The ratio between zero-zero pixels and other pixels is large: 0.62. Maybe you should use a ROI.

Warning! y-intercept far from zero - The ratio of the y-intercept of the auto threshold regression line to the mean value of Channel 2 is high. This means the y-intercept is far from zero, implying a significant positive or negative zero offset in the image data intensities. Maybe you should use a ROI. Maybe do a background subtraction in both channels. Make sure you didn't clip off the low

intensities to zero. This might not affect Pearson's correlation values very much, but might harm other results.
